# OUR TREATMENTS

## **ANTI-WRINKLE INJECTIONS**

An injectable treatment to help reduce the appearance of facial lines. Botulinum toxin, an FDA approved drug is injected to relax the facial muscles. The treatment works by strategically balancing overactive muscles so that facial wrinkles and lines become less noticeable.

## **DERMAL FILLERS**

A naturally occurring hyaluronic-acid gel is injected into the face to help smooth wrinkles and folds. They are used to add volume to facial features or replace volume that has been lost with age, and assist in defining, enhancing and reshaping facial contours.

## **PROFHILO**

A hydrating, remodelling form of hyaluronic acid, injected into the superficial layers of the skin, improving the appearance of skin quality by addressing laxity, crepiness and fine lines. It promotes skin radiance, tightening, lifting and glow without adding any volume, resulting in a natural rejuvenating appearance of the skin, used to treat the face, neck, hands and body.

## **PLATELET RICH PLASMA**

Platelet-rich plasma (PRP) involves taking blood from the patient, which is then spun in a centrifuge to separate the plasma from the rest of the blood. The plasma contains powerful nutrients, growth factors and stem cells, which are essential for cellular rejuvenation. The plasma is then injected into the superficial layer of the skin - in combination with microneedling - to boost collagen production at ultra optimal levels.

## **FAT DISSOLVING INJECTIONS**

Aqualyx treatment is a fat dissolving injection which works by liquidating fat cells, and destroying them permanently. The broken down cells are then eliminated naturally through the lymphatic system. They are an excellent treatment for those looking to treat areas on the body with stubborn, localised fat. Please note that Aqualyx® fat dissolving injection is a body contouring treatment, not a weight loss solution. For optimal results, a minimum of 3 sessions spaced 2-4 weeks apart are recommended to achieve visible results.

# OUR FACIALS

## **RED CARPET FACIAL**

Using WOW Fusion Device, Anti-wrinkle agents (known as Toxins) are added in small doses to your bespoke made cocktail. Toxins penetrate the superficial layers of the skin, relaxing muscles that surround the pores and sebaceous glands, preventing the pores from opening and releasing excess oil and sweat. This helps maintain oil production, aiding conditions like acne and rosacea. The results speak for themselves, you are well on your way to the GALA !
